Information on the KSMU electronic resources

The list of remote resources for distance learning

The university library has a wide range of electronic informational and educational resources.

Access to the electronic resources is possible on the university site:
https://kurskmed.com/

➢ In the section "Library" («Библиотека»)

➢ In the "User Account" («Личном кабинете») (access on the main page of the site (upper panel on the right) with personal username and password).)
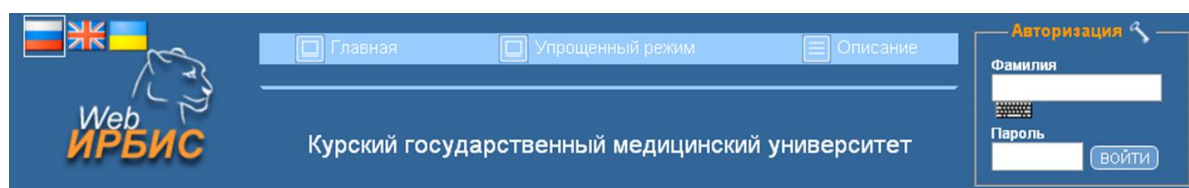

<div align="center">

The electronic library includes:

</div>

1. Resources of its own regeneration:

   The electronic library of Kursk State Medical University "Medicus" *(certificate of the state registration no. 2015620262 dated 11.02.2015)* includes electronic catalog and full-text databases. The electronic library "Medicus" contains textbooks, teaching materials on the subjects studied; dissertations and abstracts of dissertations that were defended at KSMU; articles from periodicals published by the University employees; graduation thesis and other documents.

   To access the full texts of electronic resources it is necessary to log in to the electronic catalog on the site in the section "Library- Online Library" («Библиотека → Онлайн библиотека»).

   It is necessary to enter last name and barcode from your electronic pass (an 11-digit number without the first and last digits) in the "last name from the pass" and "password" («фамилия с пропуска» и «пароль»).
   Authorization in the electronic catalog also provides access to all additional services (electronic reader's record card, order and reservation, online borrowing period extension of literature).

   In the future, you can also access the electronic catalog through your personal account (in the main page of the site).

   External electronic resources:

   Remote electronic library systems and full-text databases.

   Access from the site in the section "Library – Online library" (**«Библиотека → Онлайн библиотека»).**

   All the necessary usernames and passwords
   for the access to the electronic library system (ELS)
   and full-text databases you can get in the library.
