Задачник для студентов Международного медицинского института для подготовки к практическим занятиям по биологической химии : [на англ. яз.] = Situational tasks in biochemistry for students of international Medical Institute to prepare for practical training / С. А. Долгарева, М. Ю. Смахтин, О. А. Сунайкина [и др.] ; Курский государственный медицинский университет, каф. биологической химии. - Курск : Изд-во КГМУ, 2021. - 95 с. : ил.

FULL TEXT

Situational tasks include the material developed in correlation with Federal state standard of the third generation. Situational tasks contain a plan or important additional information for proper answering at practical classes. The material includes questions and tasks helping students to apply their knowledge in situations, related to clinical ones. The analysis of tasks allows students to study the material deeply, to develop their logical reasoning, to systematize the theoretical knowledge with its corresponding interpretation for practical medicine aims. An important tasks section are demands to the results of mastering the discipline based on the competence approach. Besides, the students can find here a list of practical skills and typical examinational questions.

Методические рекомендации для студентов международного факультета по подготовке к практическим занятиям по биологической химии = Methodical recommendations in biochemistry for students of the international faculty to prepare for practical training : [на англ. яз.] / Курский гос. мед. ун-т, каф. биол. химии ; под ред.
