# TEXTBOOKS OF DERMATOLOGY

virtual exhibition

Lipoff, J. **Dermatology Simplified: Outlines and Mnemonics : Textbook** / J. Lipoff, D. R. Dasilva. – 2nd ed. – Springer Cham, 2024. – 412 p. – URL : <https://link.springer.com/book/10.1007/978-3-031-66739-8>.

This revised and updated practical textbook is derived from notes taken during dermatology residency and represents a comprehensive yet condensed approach to the dermatology curriculum, listing every entity with only the most important and testable facts and mnemonics. This guide puts it all into a concise and manageable context. Furthermore, introductions to the dermatology physical exam and dermatopathology, as well as short guides describing the basics of medications, basic science, cosmetics and surgery are included.

The goal - but rather to help young dermatologists learn to create differential diagnoses and memorize all the important facts for myriad diseases. Given its unique approach, this guide will serve new residents well in quickly adapting to their new field, while also helping senior residents as a quick review of all topics in preparation for the in-service and board examinations (reflecting the priorities of the new CORE exams). This book is therefore an important resource for all dermatology students, residents, other trainees on dermatology rotations, and faculty.

*Second Edition*

 Springer

**Jain, S. Dermatology : Illustrated Study Guide and Comprehensive Board Review / S. Jain. – 3rd ed. – Springer Cham, 2025. – 458 p. : il. – URL : <https://link.springer.com/book/10.1007/978-3-031-73140-2>.**

A fully-illustrated, note-packed volume of information, Dermatology: Illustrated Study Guide and Comprehensive Board Review fulfills a real need for a single study guide for the Dermatology Board Exam. The text focuses on presenting comprehensive information in an easy-to-understand, easy-to-remember format.

The third edition of this incredibly popular book includes:

Close to 800 full-color clinical and histologic images;

Over 75 new histopathologic images and over 170 tables;

Layout similar to third edition with outline approach.

Clinical images parallel to corresponding text for easy reinforcement of text

Updated coverage of new medications, new entities, and new genetic mutations.

It is an excellent review source for dermatology with easy to read format, numerous mnemonics and high-quality clinical images.

**Brownstone, N. The Ultimate Medical Student Guide to Dermatology / N. Brownstone. – Springer Cham, 2025. – 229 p. – URL : <https://link.springer.com/book/10.1007/978-3-031-98765-6>.**

This book is an up-to-date and comprehensive board review and clinical quick reference text for students interested in dermatology. It provides both high yield exam review pearls for the USMLE (United States Medical Licensing Exam) Step 1 and Step 2 CK (Clinical Knowledge) exams and high yield clinical pearls regarding the diagnosis and management of common dermatological conditions that every student should master.

It relays to the reader a contemporary view of dermatological practice and presents it in an easy to digest and rapid review format that is crafted for new learners in dermatology and students completing 4th year visiting rotations. This book will also introduce students to a career in dermatology while simultaneously providing a section on common misnomers in dermatology, eponyms in dermatology and “buzzwords” that are used in everyday dermatological practice that can be confusing for students beginning to care for patients with skin disease.

# Geriatric Dermatology

 Springer

**Geriatric Dermatology / ed. R. Norman, T. S. Dharmarajan. – Springer Cham, 2026. – 1300 p. : il. – URL : <https://link.springer.com/book/9783032061157>.**

This major reference work details the clinical management of older patients with diseases of the skin and provides an exceptional level of educational information for residents in internal medicine and dermatology, fellows in geriatric medicine and physicians engaged in the practice of dermatology, geriatrics, family medicine and internal medicine. With the trends in the aging population globally, the indications to evaluate and manage the growing geriatric population and their health disorders is likely to become increasingly relevant for decades to come. Preparation for these changes in society involves provision of up-to-date knowledge for current and future generations of physicians to deal with the health problems of older adults.
