NEW BOOKS IN THE LIBRARY

Khrustalev, Yu. M. Bioethics. Philosophy of preservation of life and preservation of health : textbook = Биоэтика. Философия сохранения жизни и сбережения здоровья : учебник для студентов учреждений ВПО, обучающихся по специальностям 31.05.02 «Педиатрия», 35.05.01 «Медико-профилактическое дело», 31.05.03 «Стоматология», 33.05.01 «Фармация» по дисциплине «Биоэтика» / Yu. M. Khrustalev. - Moscow : GEOTAR-Media, 2022. - 324 p.

[FULL TEXT](#)

Abstract:

The textbook represents a modular presentation of ethics, bioethics and biomedical ethics. Its goal is a philosophical interpretation of novel ethical problems in modern health care as a special kind of theory and practice of treatment and prevention of diseases that doctors, pharmacists, nurses and other healthcare workers in the course of their professional activity.

In the textbook bioethics is presented as a new moral thinking and worldview of specialists, which should become the essence and meaning of their creative activity. Historical and ethical material is organically combined with modern philosophical understanding of moral problems arising in the field of protecting life and preserving people's health, as well as in the intellectual and moral development of a medical specialist.

The key problems of bioethics are set out in accordance with the programs and work plans of classes on the course of bioethics adopted in most medical universities of the country. The innovative content of the textbook makes it useful for students of humanities universities and colleges, as well as for those who are interested in the problems of the evolution of ethics.

СОЕДИНИТЕЛЬНАЯ ТКАНЬ

Учебное пособие для студентов медицинских
и фармацевтических учебных заведений
высшего образования с использованием
языка-посредника (английский)

Курск–2022

Соединительная ткань = Connective tissue : учебное пособие для студентов медицинских и фармацевтических учебных заведений высшего образования с использованием языка посредника (английский) : [на англ. яз.] / Курский государственный медицинский университет, Кафедра гистологии, эмбриологии, цитологии ; авт.-сост.: Е. С. Мишина, Н. П. Омельченко. - Курск : Изд-во КГМУ, 2022. - 99 с. : ил.

[FULL TEXT](#)

Abstract:

The textbook is intended for students studying at the morphological departments of medical and pharmaceutical educational institutions of higher education using an intermediary language (English). Contains texts, illustrative material, tests for self-control.

CONTENTS

Chapter 1. Definitions, principles and features of histophysiology and biochemistry of connective tissue.....	6 p.
Chapter 2. Cellular elements of connective tissue.....	12 p.
Chapter 3. Extracellular matrix of connective tissue.....	46 p.
Chapter 4. Regulation of metabolic functions of connective tissue.....	93 p.
Chapter 5. Biochemical and molecular biological mechanisms and phenomena of connective tissue aging.....	98 p.

Abstract:

This tutorial was written at the department of Histology, Embryology, Cytology of the Kursk State Medical University according to the Educational program of the discipline «Histology, Embryology, Cytology» and on the basis of the Directive concerning Educational and Methodological Support of the Discipline (Module) approved by the meeting of the Academic Council of the KSMU on the 10th of October 2016. The main goal of this tutorial was to introduce new scientific findings and incorporate them into the educational material for medical students. It can be used as both solitary and supplement material for studying General Histology and Cell Biology.

TUTORIAL
ON THE PHYSIOLOGY OF
EXCITABLE TISSUES

(for students of the International medical institute)

KURSK – 2022

Учебное пособие по физиологии возбудимых тканей = Tutorial on the physiology of excitable tissues (for students of the International medical institute) : (для студентов международного медицинского института) : [на англ. яз.] / Курский государственный медицинский университет, Кафедра нормальной физиологии ; под ред. Н. В. Репаловой, Е. В. Авдеевой. - Курск : Изд-во КГМУ, 2022. - 91 с. : ил., табл.

[FULL TEXT](#)

Abstract:

The educational tutorial on physiology of excitable tissues facilitates the improvement of students' self-preparation work. The given tutorial contains theoretical basis for topics of the chapter «Physiology of excitable tissues», the description of laboratory works in accordance with approved educational programs on the discipline for international students as well as a complete set of questions and examples of test tasks for self-control and the list of situational problems.

CONTENTS

Preface	5
Approximate basis for students' actions during self-study.....	6
Topic: Bioelectrical phenomena in the excitable tissues	8
Structure and functions of the cell membrane.....	9
Irritant.....	15
Excitable tissues.....	15
Resting membrane potential.....	17
Action potential.....	19
Changes in excitability during the action potential.....	22
Local response.....	24
Recommended laboratory works.....	25
Questions for self-control.....	31
Examples of tests for self-control.....	32
Obligatory tasks.....	34
Recommended literature	35
Supplementary literature.....	35
Topic: Physiological properties of nerves. Neuromuscular transmission..	35
Functions of nerves.....	36
Structure of the neuron.....	36
Special aspects of the signal transmission in nerve trunks.....	39
Laws of excitation, conduction in nerves.....	43
Classifications of nerve fibers.....	44
Structure and functions of the neuromuscular junction.....	45
Mechanism of neuromuscular transmission.....	46

Recomended laboratory works.....	48
Questions for self-control.....	52
Examples of tests for self-control.....	52
Obligatory tasks.....	54
Recommended literature	55
Supplementary literature.....	55
Topic: Physiological properties of skeletal and smooth muscles.....	55
Functions of muscles. Types of the muscles.....	57
Skeletal muscle structure.....	58
Motor units.....	61
Skeletal muscle contractions.....	62
Summation of muscle contractions.....	67
Energy of muscle contraction.....	70
Work and strength of the muscle.....	70
Muscle fatigue.....	72
Smooth muscles, types, structure.....	72
Chemical and physical base for smooth muscle contraction.....	73
Neuro-muscular junctions of the smooth muscle.....	76
Recomended laboratory works.....	77
Questions for self-control.....	82

Examples of tests for self-control.....	83
Obligatory tasks.....	85
Recommended literature	85
Supplementary literature.....	86
References.....	87
Pages for your notes.....	92

INTRODUCTION TO EFFECTIVE COMMUNICATION

A study guide for the international students
of International Medical Institute

Шульгина, Т. А. Введение в эффективную коммуникацию = Introduction to effective communication : учебное пособие для обучающихся Международного медицинского института : [на англ. яз.] / Т. А. Шульгина, Ю. С. Филиппович, М. С. Филиппович ; Курский государственный медицинский университет. - Курск : Изд-во КГМУ, 2022. - 192 с.

[FULL TEXT](#)

Abstract:

This study guide presents the most essential base of knowledge for a shorter course. The book is adapted for pre-med and med students to break down the barriers to effective communication. Readers are advised to check the additional materials given in the second section «Take Actions». It is provided with the most current information on literature and case-studies that will help to comprehend the current state of student's skills and to improve them.

CONTENTS

Chapter I What Is Communication?	6
Chapter II Perception	26
Chapter III Self-Concept	38
Chapter IV Language And Its Meaning	53
Chapter V Verbal Communication	64
Chapter VI Nonverbal Communication	80
Chapter VII Interpersonal Communication	102
Chapter VIII Culture and Communication	116
Chapter IX Conflicts.....	129
Chapter X Patient Education	152
Chapter XI Psychology of Persuasion.....	165
